

Fees

Comprehensive Screenings

Comprehensive Health Assessment	£145
Focal area assessment and treatment (set dysfunctional area) (90 minutes)	£85
(See below for specific screenings)	
Vitality MOT (90 minutes)	£85
Follow ups (60 minutes)	£55

Acute (immediate) issues

Dealing with an issue as soon as it starts is ideal- there are many ways to prevent an issue becoming stuck or chronic. The worst thing is not to do anything.

£55 per hour

Reports

We have found that providing extensive reports is often confusing. Assessment information is purely to provide a basis for lifestyle, remedy and treatment approaches. Our experience is that this information is best absorbed when it is written down by the client as a summary during the end of session review.

For some consultations we have a standard score sheet in which the relevant information is graded on a high, medium or low significance basis (allergy, nutrition, remedies, lifestyle changes)

Formalized reports are time intensive in preparation. However we recognize that you may wish to have a more specific report and are able to offer these as follows.

Full Wellness profile:	£35.
Condition specific assessment:	£20.

Specific Screenings
